

Your Digital Assistant for Business Center Management

Digital ActiveMap Management

Smart dispatching, total contractor control, and transparent analytics with the ActiveMap platform.

Unified Building Management Ecosystem

The system links all stages into a single chain, ensuring instant response and full control at every step.

Key Application Areas in Business Centers

Tenant Request Management

Fast request routing, strict deadline control (SLA), and direct feedback channels.

Cleaning Control

Scheduled rounds using checklists, with photo verification of room cleanliness, common areas, and restrooms.

Technical Maintenance

Performance control of engineers, coupled with preventive maintenance for elevators, HVAC systems, and networks.

Inventory & Infrastructure

Comprehensive accounting of all business center property overlaid on a single digital floor plan.

Total Control and 100% Reliability

Complete elimination of falsified facts and fake reports thanks to hardware-level control features.

Only “Here and Now”

Systematic block preventing the upload of old photos from the device’s gallery.

Strict Geo-Tagging

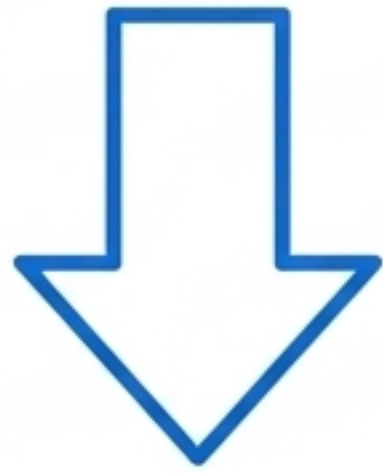

Recording precise GPS coordinates for each report and tracking staff movements across the territory.

Precise Timing

Automatic tracking of the actual start and completion times for all on-site work.

Strategic Benefits for Executives and Business

Cost Reduction

Optimization of payroll and contractor costs by identifying "ghost workers" and accurately tracking real working hours.

High Service Quality

Increased tenant loyalty driven by instant resolution of everyday issues and a crystal-clean business center environment.

Transparency of Decisions

Management powered by actual hard data (Big Data), completely replacing subjective reports from subordinates.

Take your business center management to a new digital level with ActiveMap.
