

ActiveMap for Construction Supervision

Digital control of quality, timelines, and budgets across all construction stages.

Transition from Manual Chaos to Digital Evidence

The Old Way

Loss of critical site photos in disorganized shared chats.

Backdated signing of acts for hidden construction works.

Disconnect between field data and the actual project documentation.

ActiveMap

Unified evidence base secured with geo-tags and timestamps.

Tamper-proof electronic journals eliminating data falsification.

Transparent, chronological history for every single object on site.

Objective Control in the Inspector's Pocket

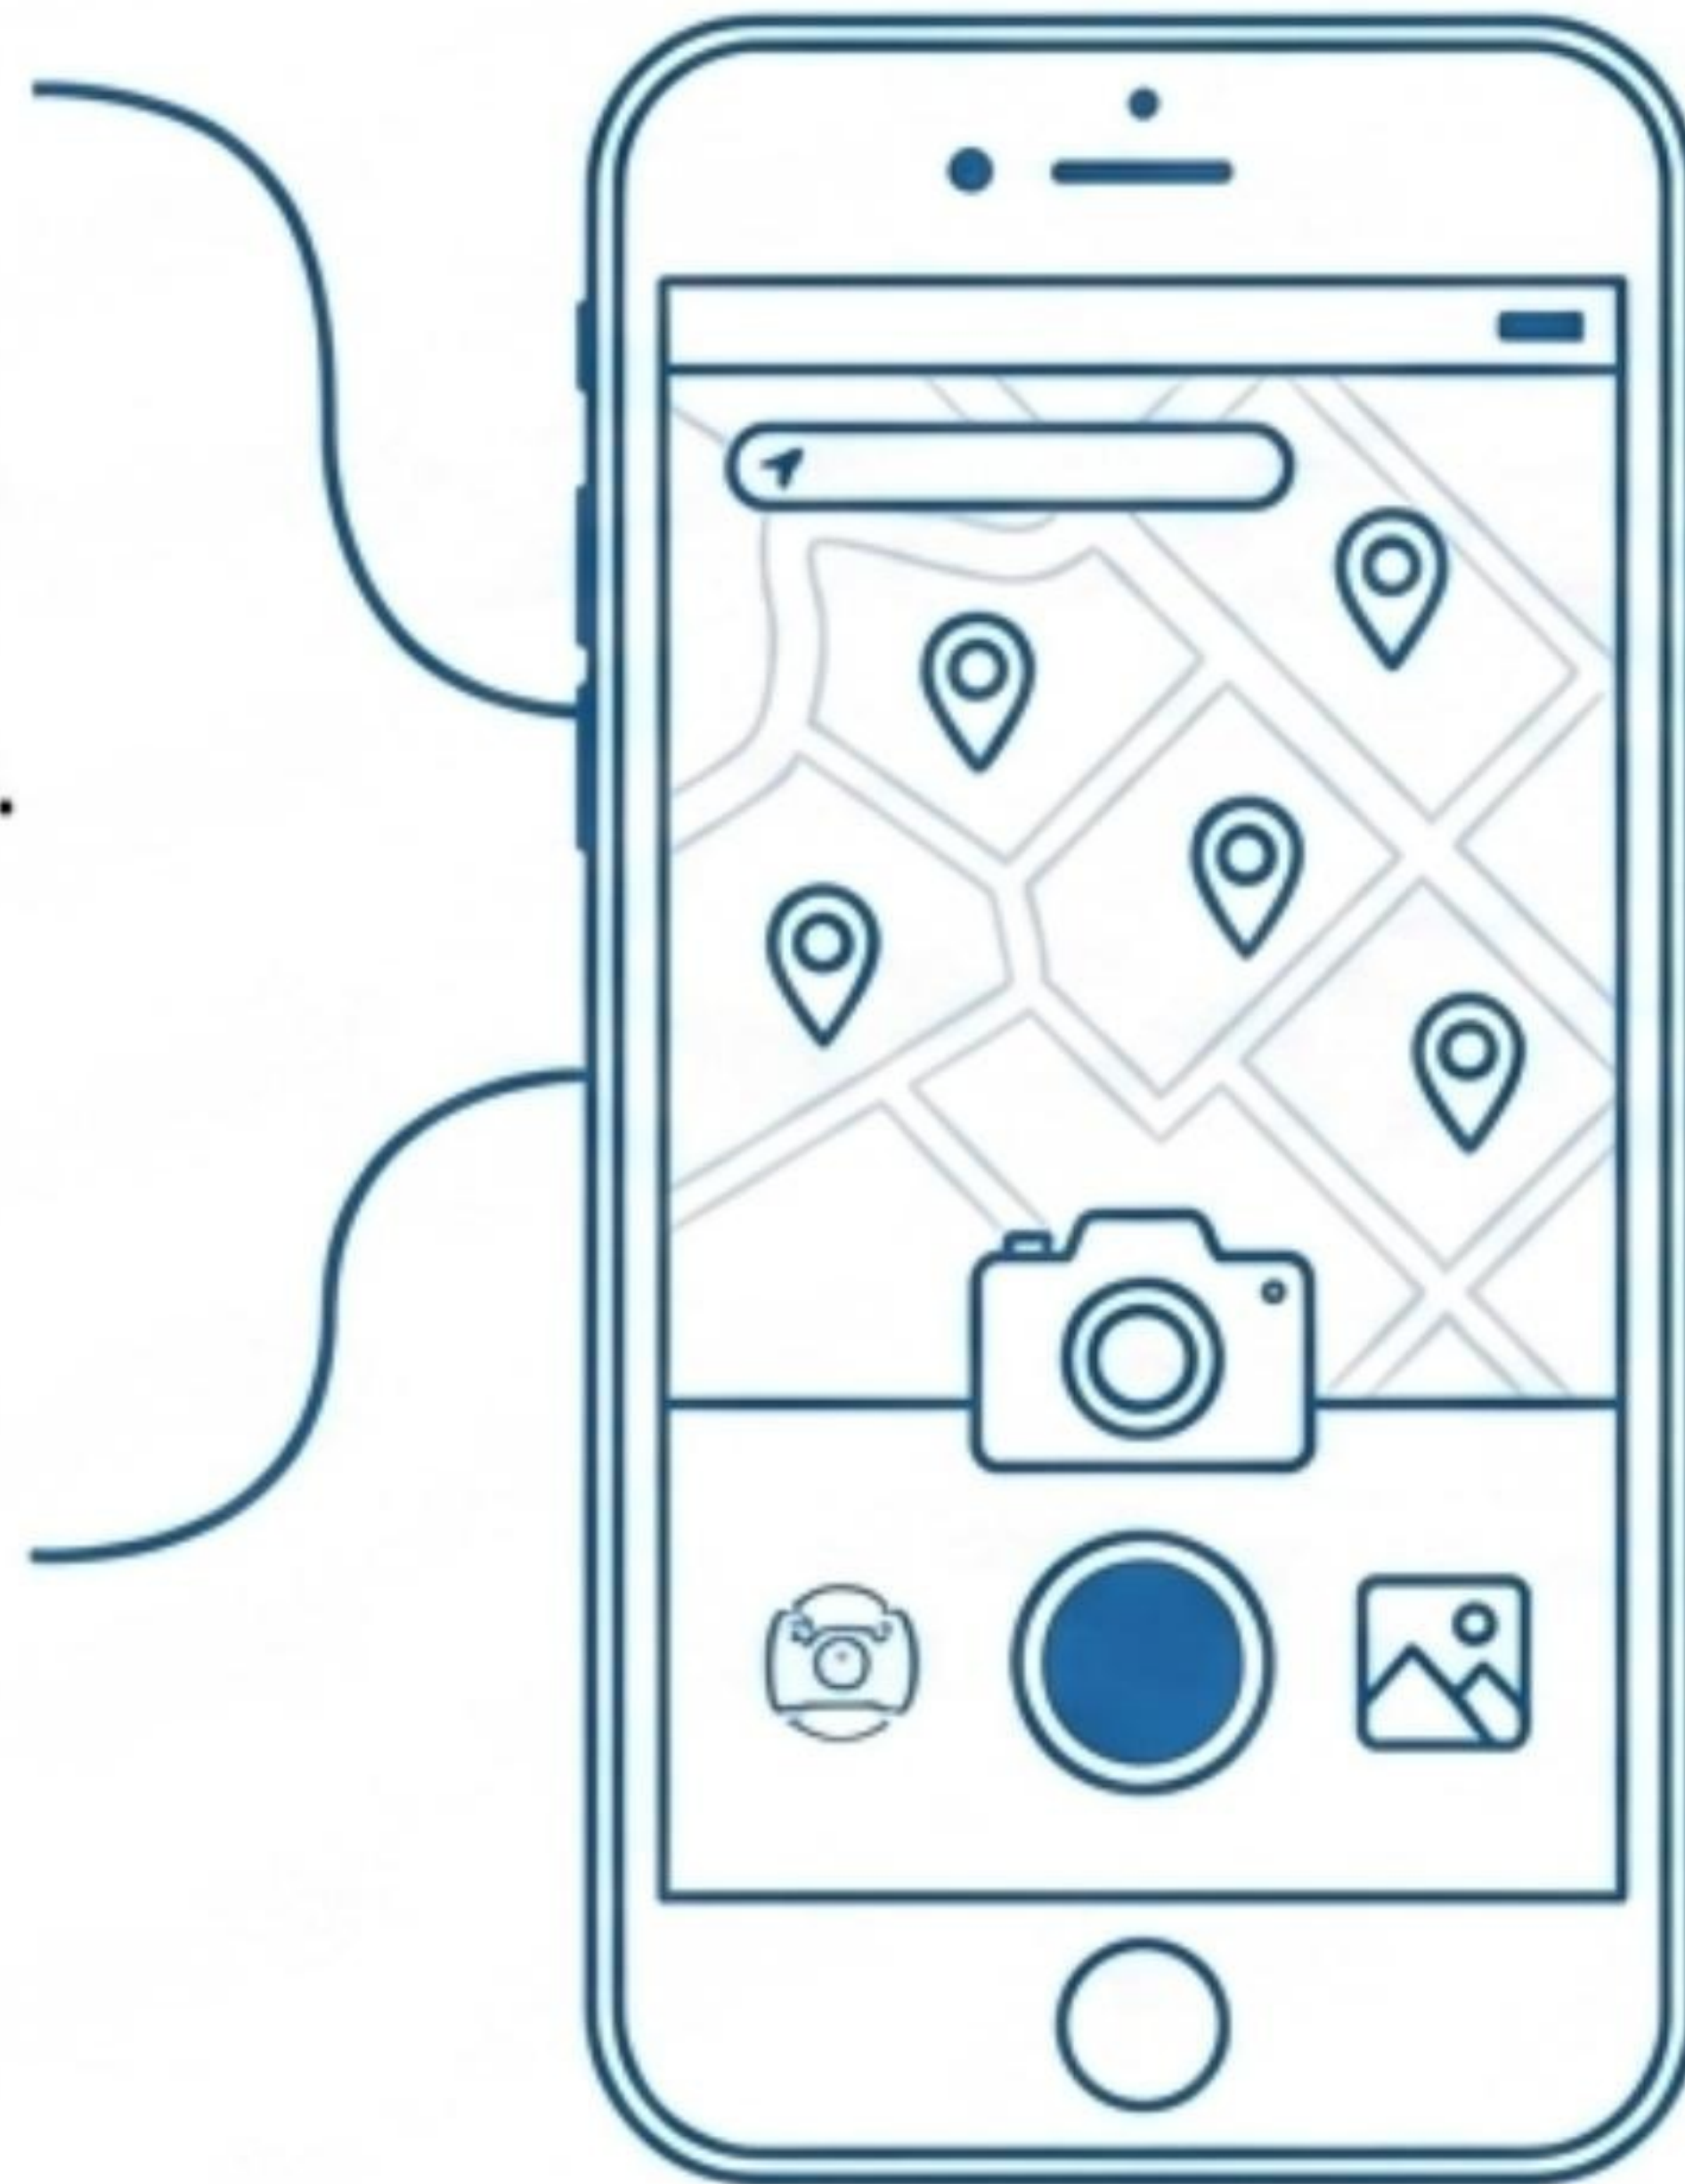

Inspection of Hidden Works

Photo documentation of every layer prior to concrete pouring or closing. Completely eliminates contractor disputes.

100% Offline Autonomy

Full functionality in deep basements and pits without internet. Auto-synchronizes seamlessly when connectivity returns.

Project Compliance Control

Remote verification of actual site photos against project blueprints. Drastically reduces the need for constant physical site visits.

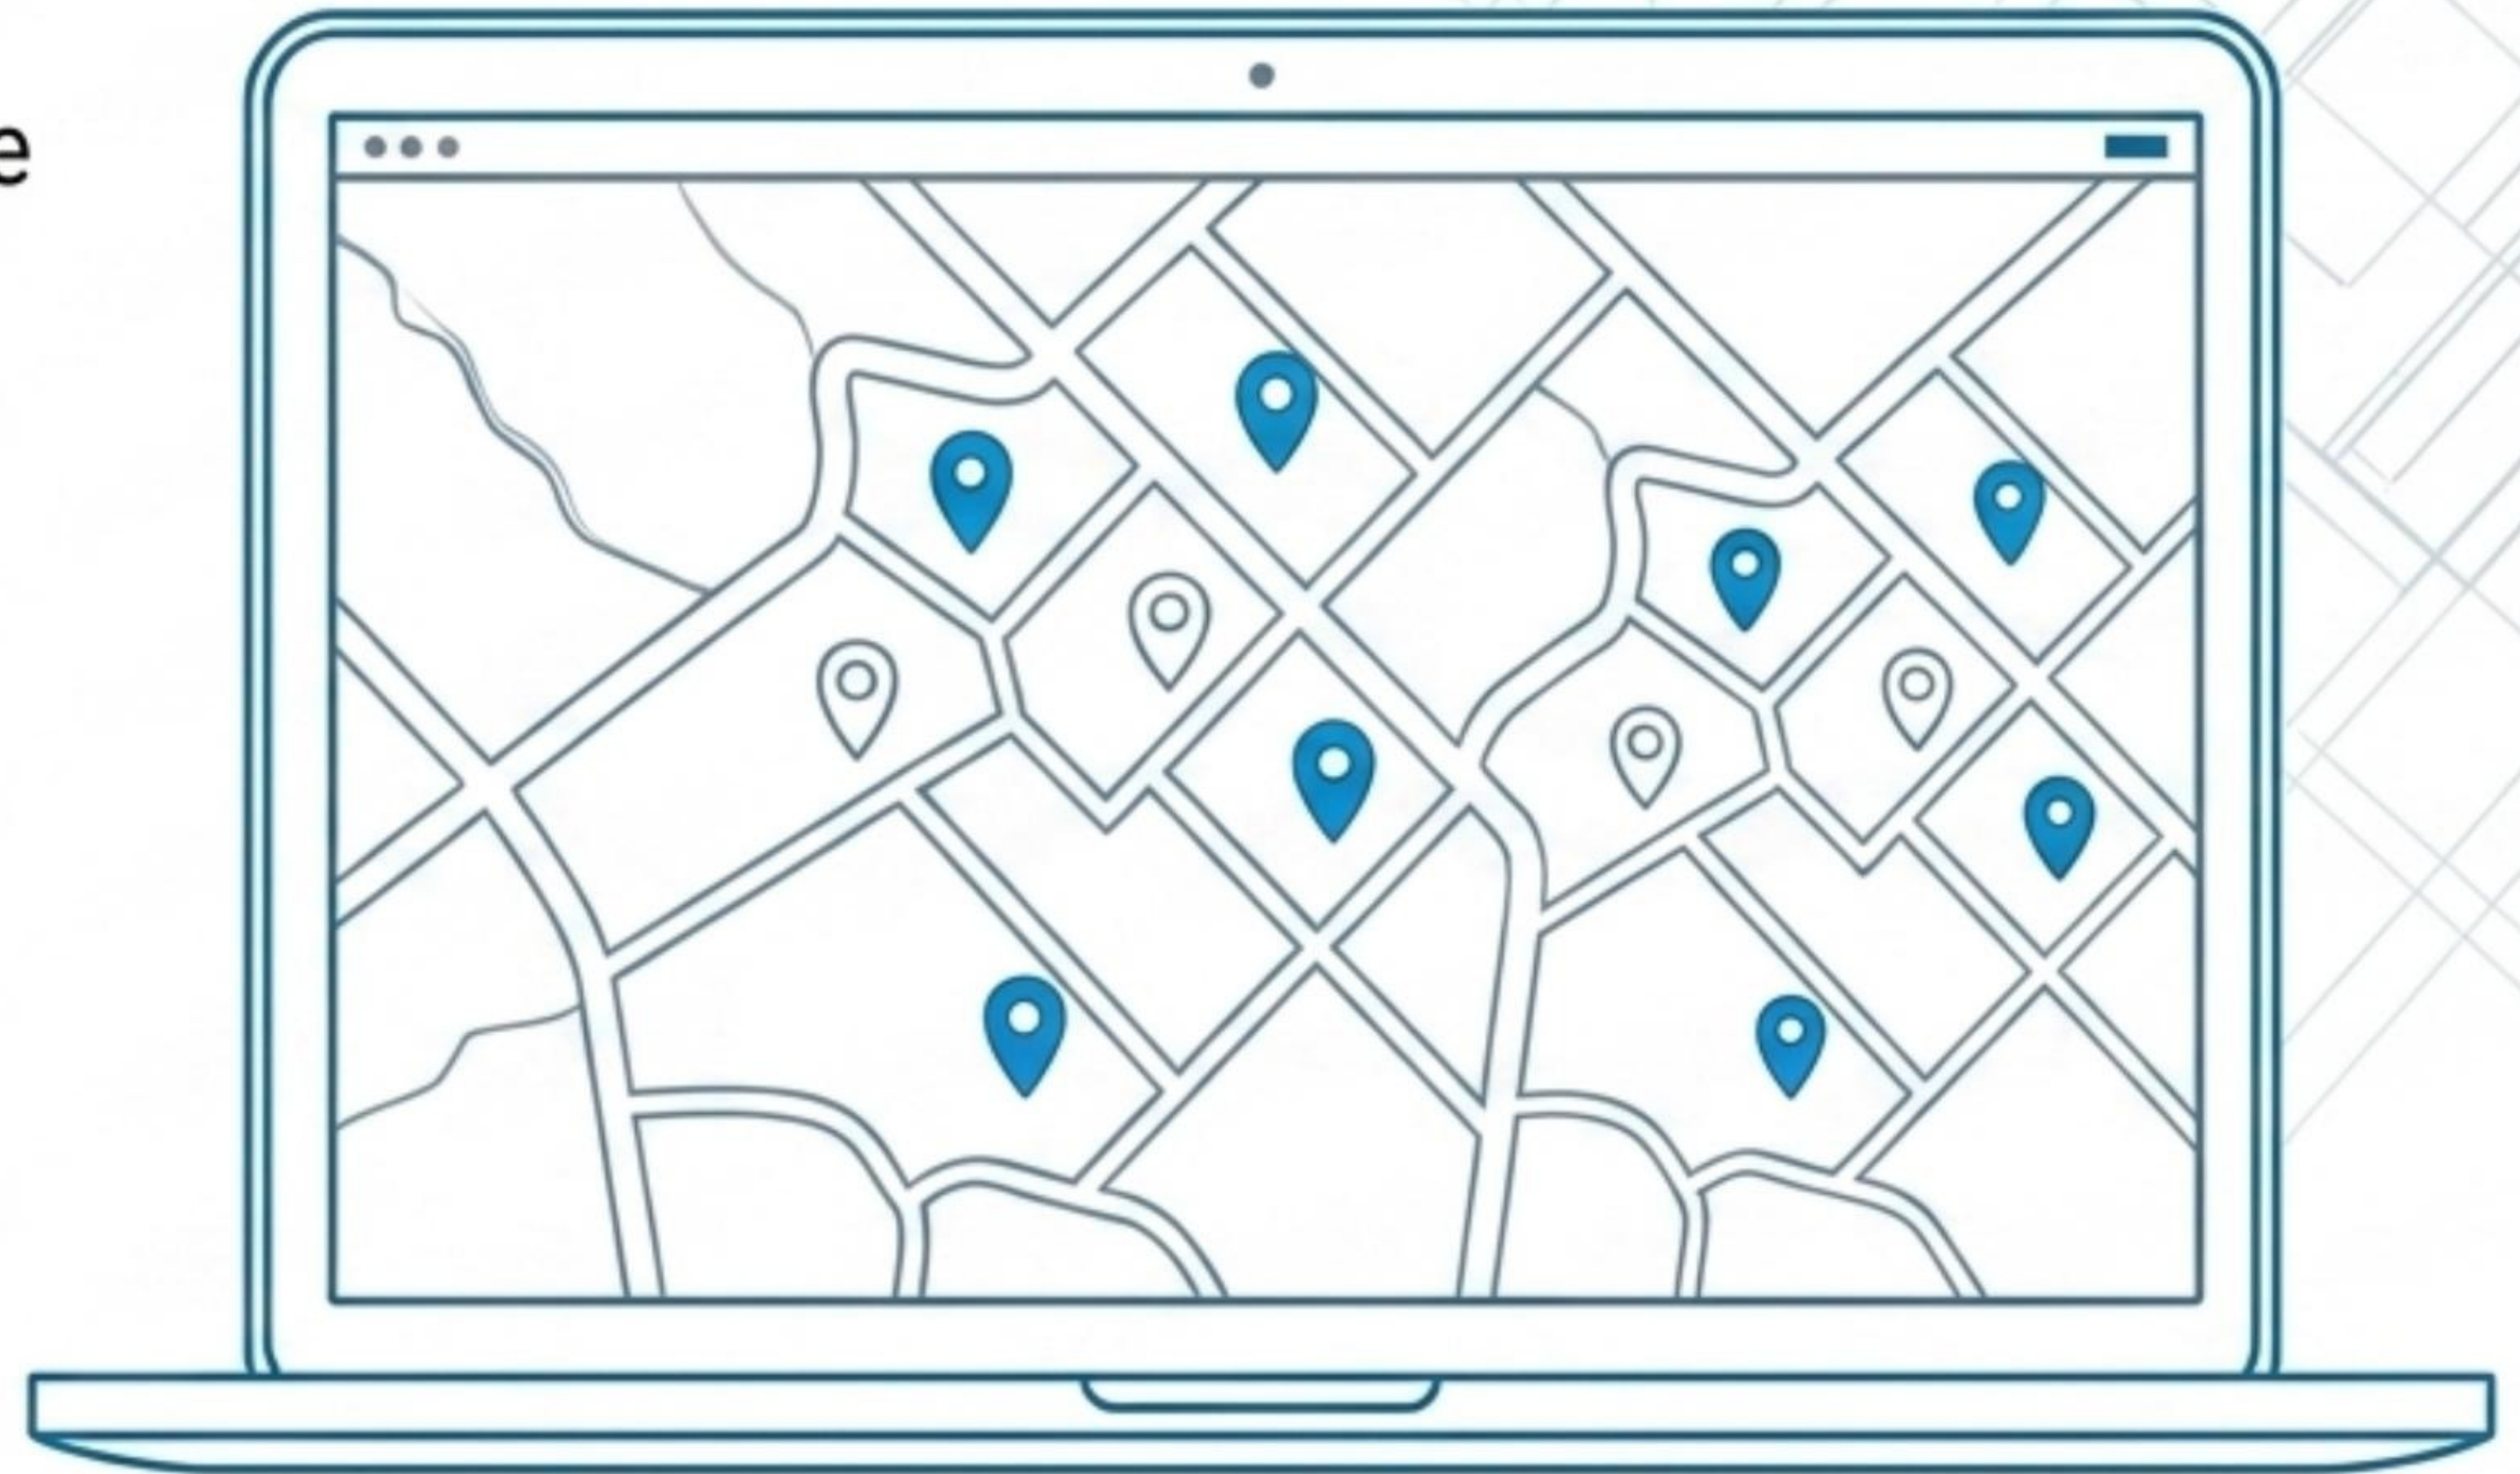

Automated Issue Management

Instant generation of PDF/XLS prescriptions for contractors, on-site signature collection, and strict tracking of defect resolution.

Strategic Analytics: The Multi-Site Control Panel

All fragmented information from disconnected construction sites aggregates into a single online command center. Investors and managers see the real-time reality of the project:

- Strict compliance with the work schedule.
- Speed of contractor issue and remark resolution.
- Comprehensive, objective assessment of construction quality.

Measurable Business Impact of Digital Supervision

50%

Reduction in communication time and accelerated decision-making speed.

20%

Increase in on-site employee discipline and accountability.

15%

Prompt operational accounting and execution expense optimization.

25%

Increase in customer and investor loyalty driven by absolute transparency.

Radical reduction in errors through an indisputable digital database. Take construction supervision to a new level of quality and transparency. [Try ActiveMap.](#)
