

Construction Under Total Control

Automating field operations with ActiveMap.

A digital management, control, and reporting system for construction and repair companies.
Abandoning paper logs in favor of 100% transparency.

A Unified Digital Environment

1

Planning

The dispatcher creates and assigns planned tasks with precise georeferencing.

2

Execution

The foreman records work progress in the mobile app (offline/online). Generates photo and video reports containing embedded time stamps, geolocation, and completion percentages.

3

Control

The manager instantly receives an objective, real-time picture of operations across all active sites.

Tools to Solve Systemic Industry Problems

Construction Control

Elimination of blind spots. Daily reports from the site with protected geo and time stamps. Creates a concrete evidence base for closing work stages.

Materials Accounting

Control over the supply and consumption of building materials directly at the site. Photo-recording of invoices and remaining balances to minimize theft and losses.

Defect Management

Automatic generation of instructions for contractors (exported as XLS/PDF). Collection of live signatures in the application directly at the site at the precise moment of inspection.

Business Impact: Transparency, Deadlines, Savings

Meeting Deadlines:

Accelerating construction processes through operational control and eliminating equipment downtime.

Cost Reduction:

Timely detection of violations reduces the cost of reworking defects and overspending on materials.

100%

Contractor Transparency:

Full control over subcontractors' work. Provides an objective database for issuing fines and penalties for violations.

Report Automation:

Instant generation of reports for the customer and general contractor for accelerated signing of completed work certificates.

From Chaos to Digital Discipline

The StroyLeader Company Experience

Implementation: Daily routing of tasks to foremen. Recording of hidden works via the mobile app with a mandatory indication of completion percentage.

The Effect: **Personification of responsibility.**

The Result: Preservation of a complete digital history for each site. Clear division of responsibility zones between officials. Objective and undeniable assessment of contractors' work quality based on actual system data.
