

For Directors and Owners of Private Security Companies

ActiveMap for PSCs: Digital Security Management

Transition from the chaos of messengers to 100% transparency for patrols and Rapid Response Teams (RRT).

Paradigm Shift: Eliminating the “Blind Spots”

The Past: Messengers & Radios

“Blind Spots”: Impossible to verify actual patrols (relying on "archive" photos, sleeping on duty).

Data Chaos: Reports and photos are lost in shared group chats.

Slow Reactions: Wasted time figuring out "who is closest" during an alarm.

The Future: ActiveMap Platform

Total Control: GPS tracking of every step with spoof-proof photo verification.

Digital Footprint: Automated reports and acts, instantly available to the client.

Rapid Dispatch: Instant incident routing to the nearest RRT.

The Workflow: From Assignment to Report

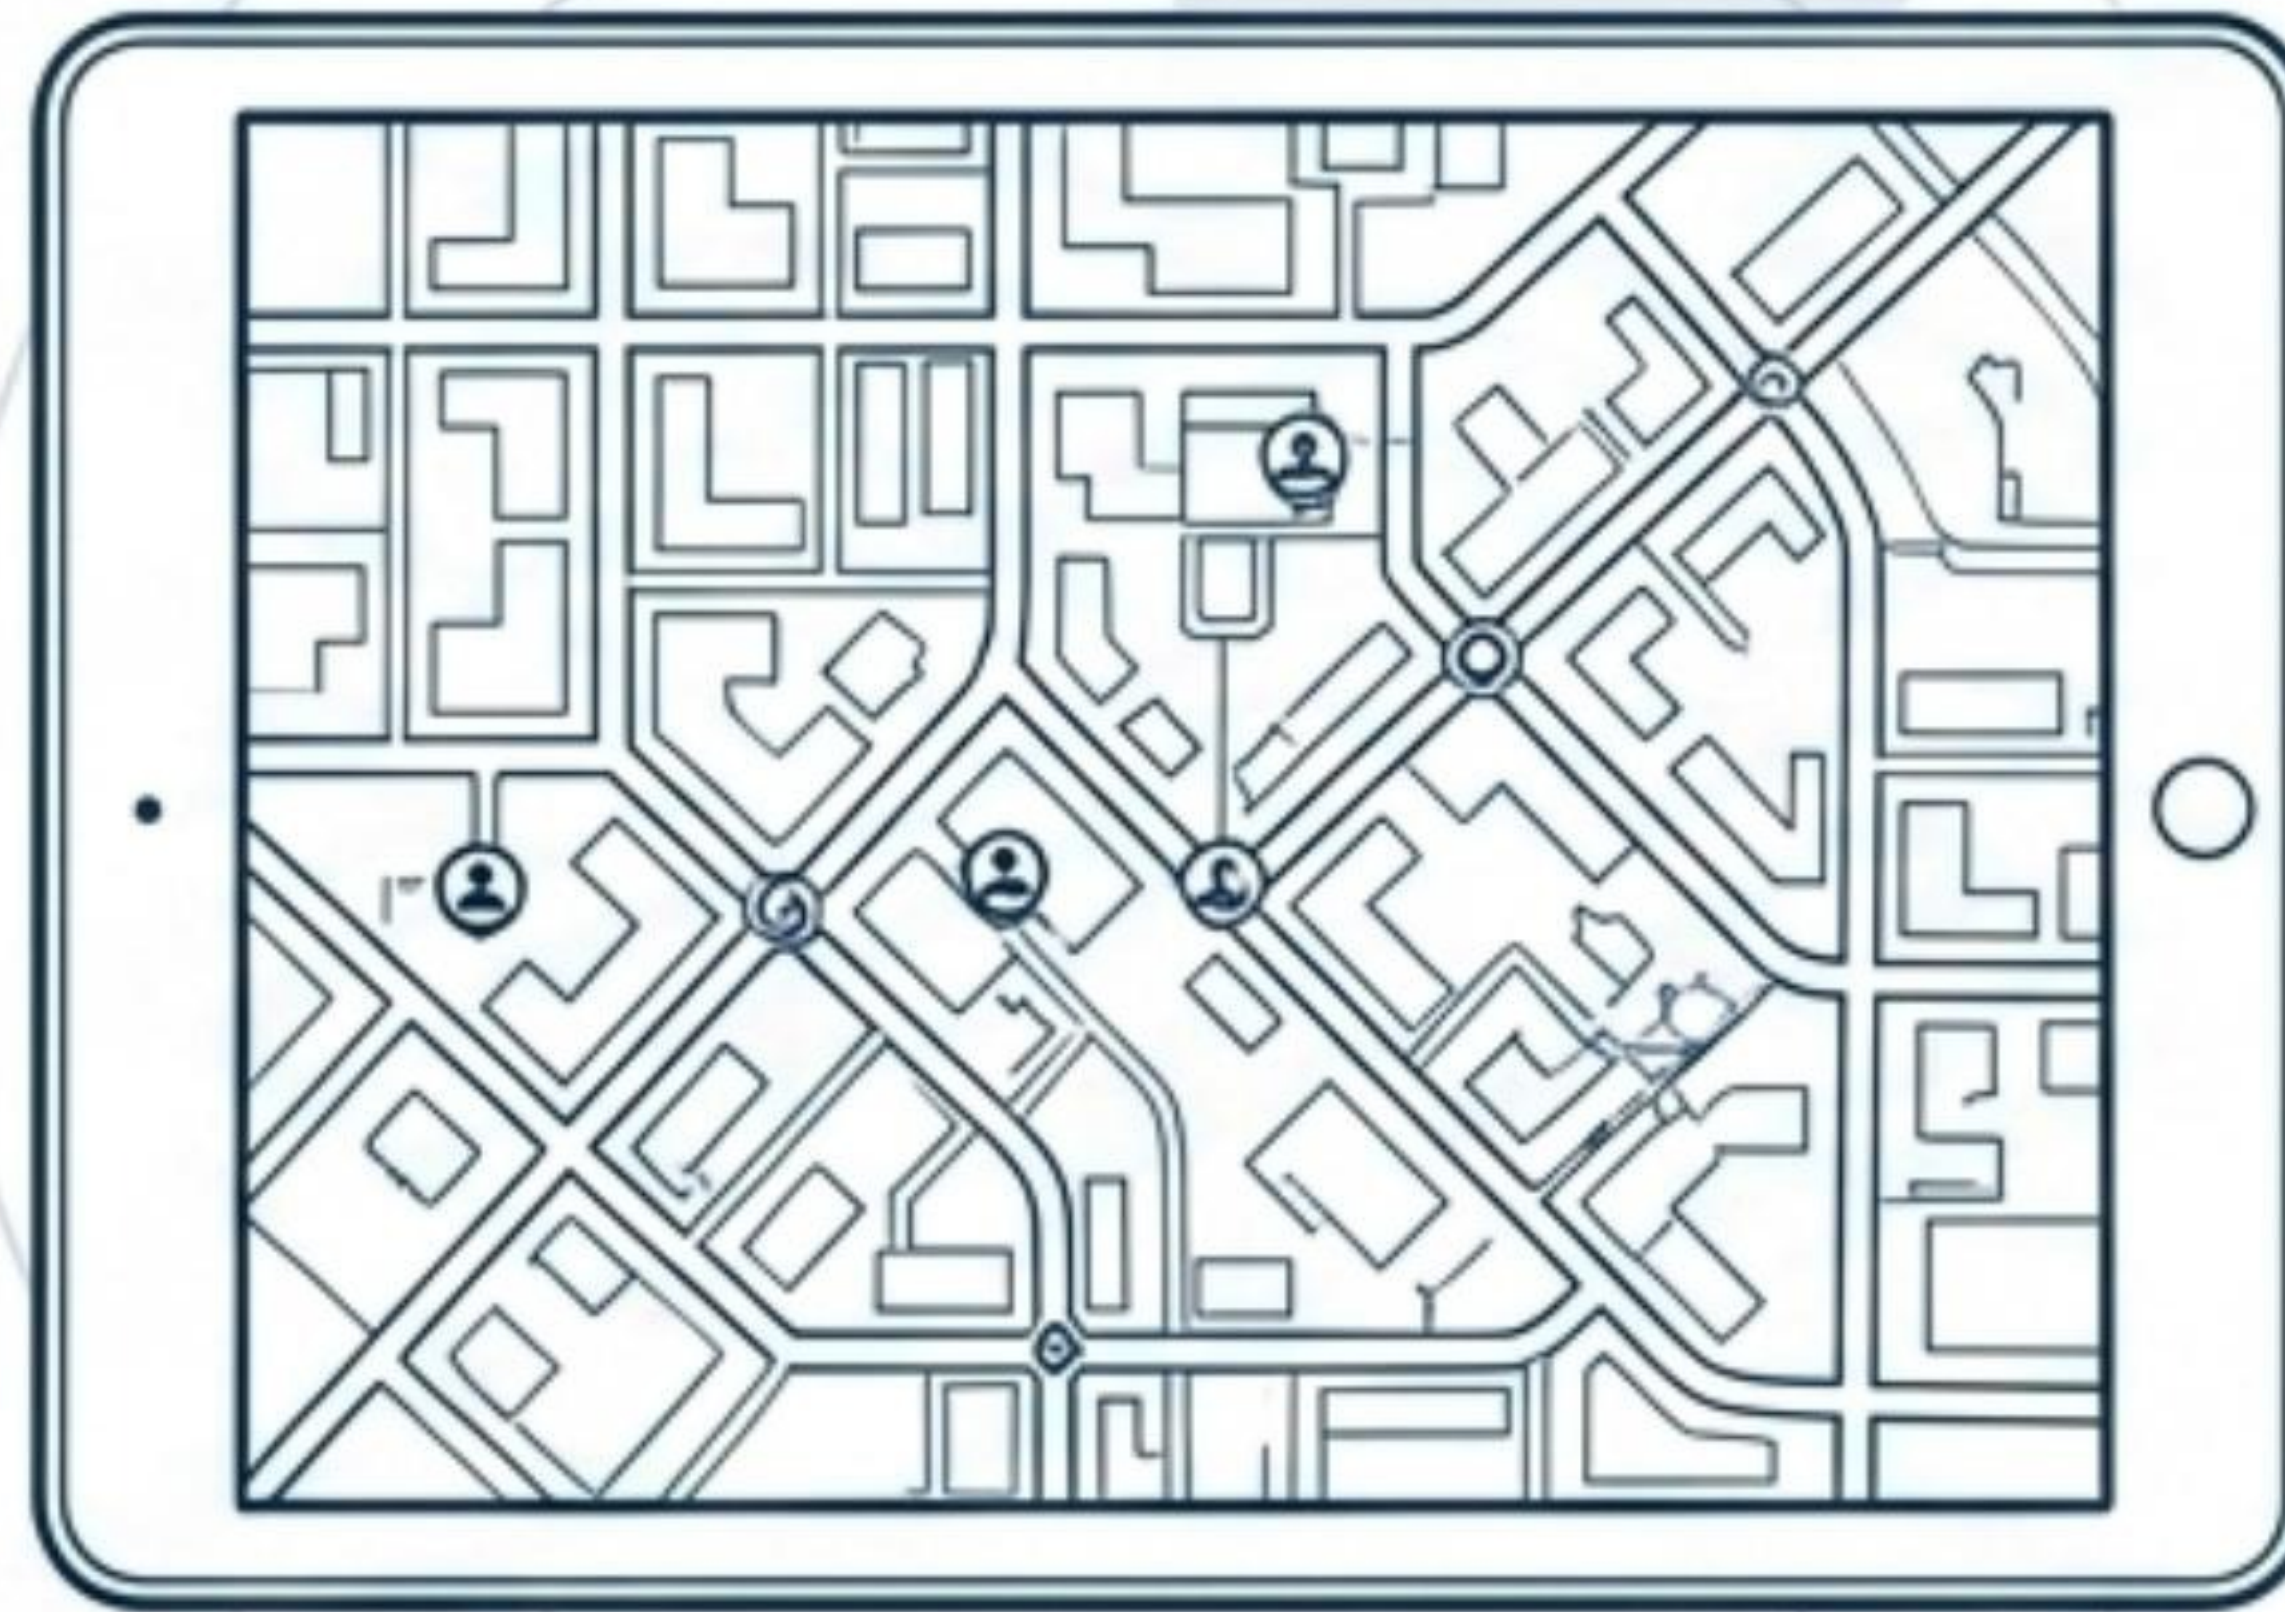

1. Task Assignment

Dispatcher sees all crews on the map. Requests are dispatched instantly.

4. Automated Reports

The system compiles checklists and photos into a finalized act immediately after the shift.

2. Patrolling (GPS + Photo)

Movement strictly along the route. Time-stamped, geo-coordinated photo verification. Works offline.

3. RRT Reaction

During an alarm, the task goes to the nearest crew. Arrival time recorded down to the second.

Implementation Impact: Results Dashboard

100%

0

2x Faster

Transparency for the Client

Undeniable digital proof of services rendered. Increases trust and retains enterprise clients.

Lost Incidents

Human error eliminated. All alarms, photo reports, and movements are securely documented.

RRT Reaction Time

Replaced manual radio dispatch with automatic map-based assignment to the nearest crew.

Proven Reliability at the Commercial Level

Project:

Over 10 Private Security Companies.

Solution:

Implementation of the ActiveMap software suite for operational coordination.

Result:

Simultaneous push-distribution of suspect orientations, automated RRT arrival status updates, and total control on a unified map.

**Make security
manageable,
and business
transparent.**
