

Digital Property Management

Effective operation of residential, commercial, and industrial real estate with ActiveMap.

Process Transformation: Analog Chaos vs. Digital Flow

Before:

- Calls, paper logs, and messenger chats
- Lost requests and lack of field control
- Heavy dependence on the human factor

After:

- Task routing directly in a mobile app
- Strict deadline control (SLA) and electronic acts
- Real-time monitoring with photo verification

The Unified Digital Ecosystem

ActiveMap automates all facility management processes, connecting every participant into a transparent and controllable environment.

Key Platform Capabilities

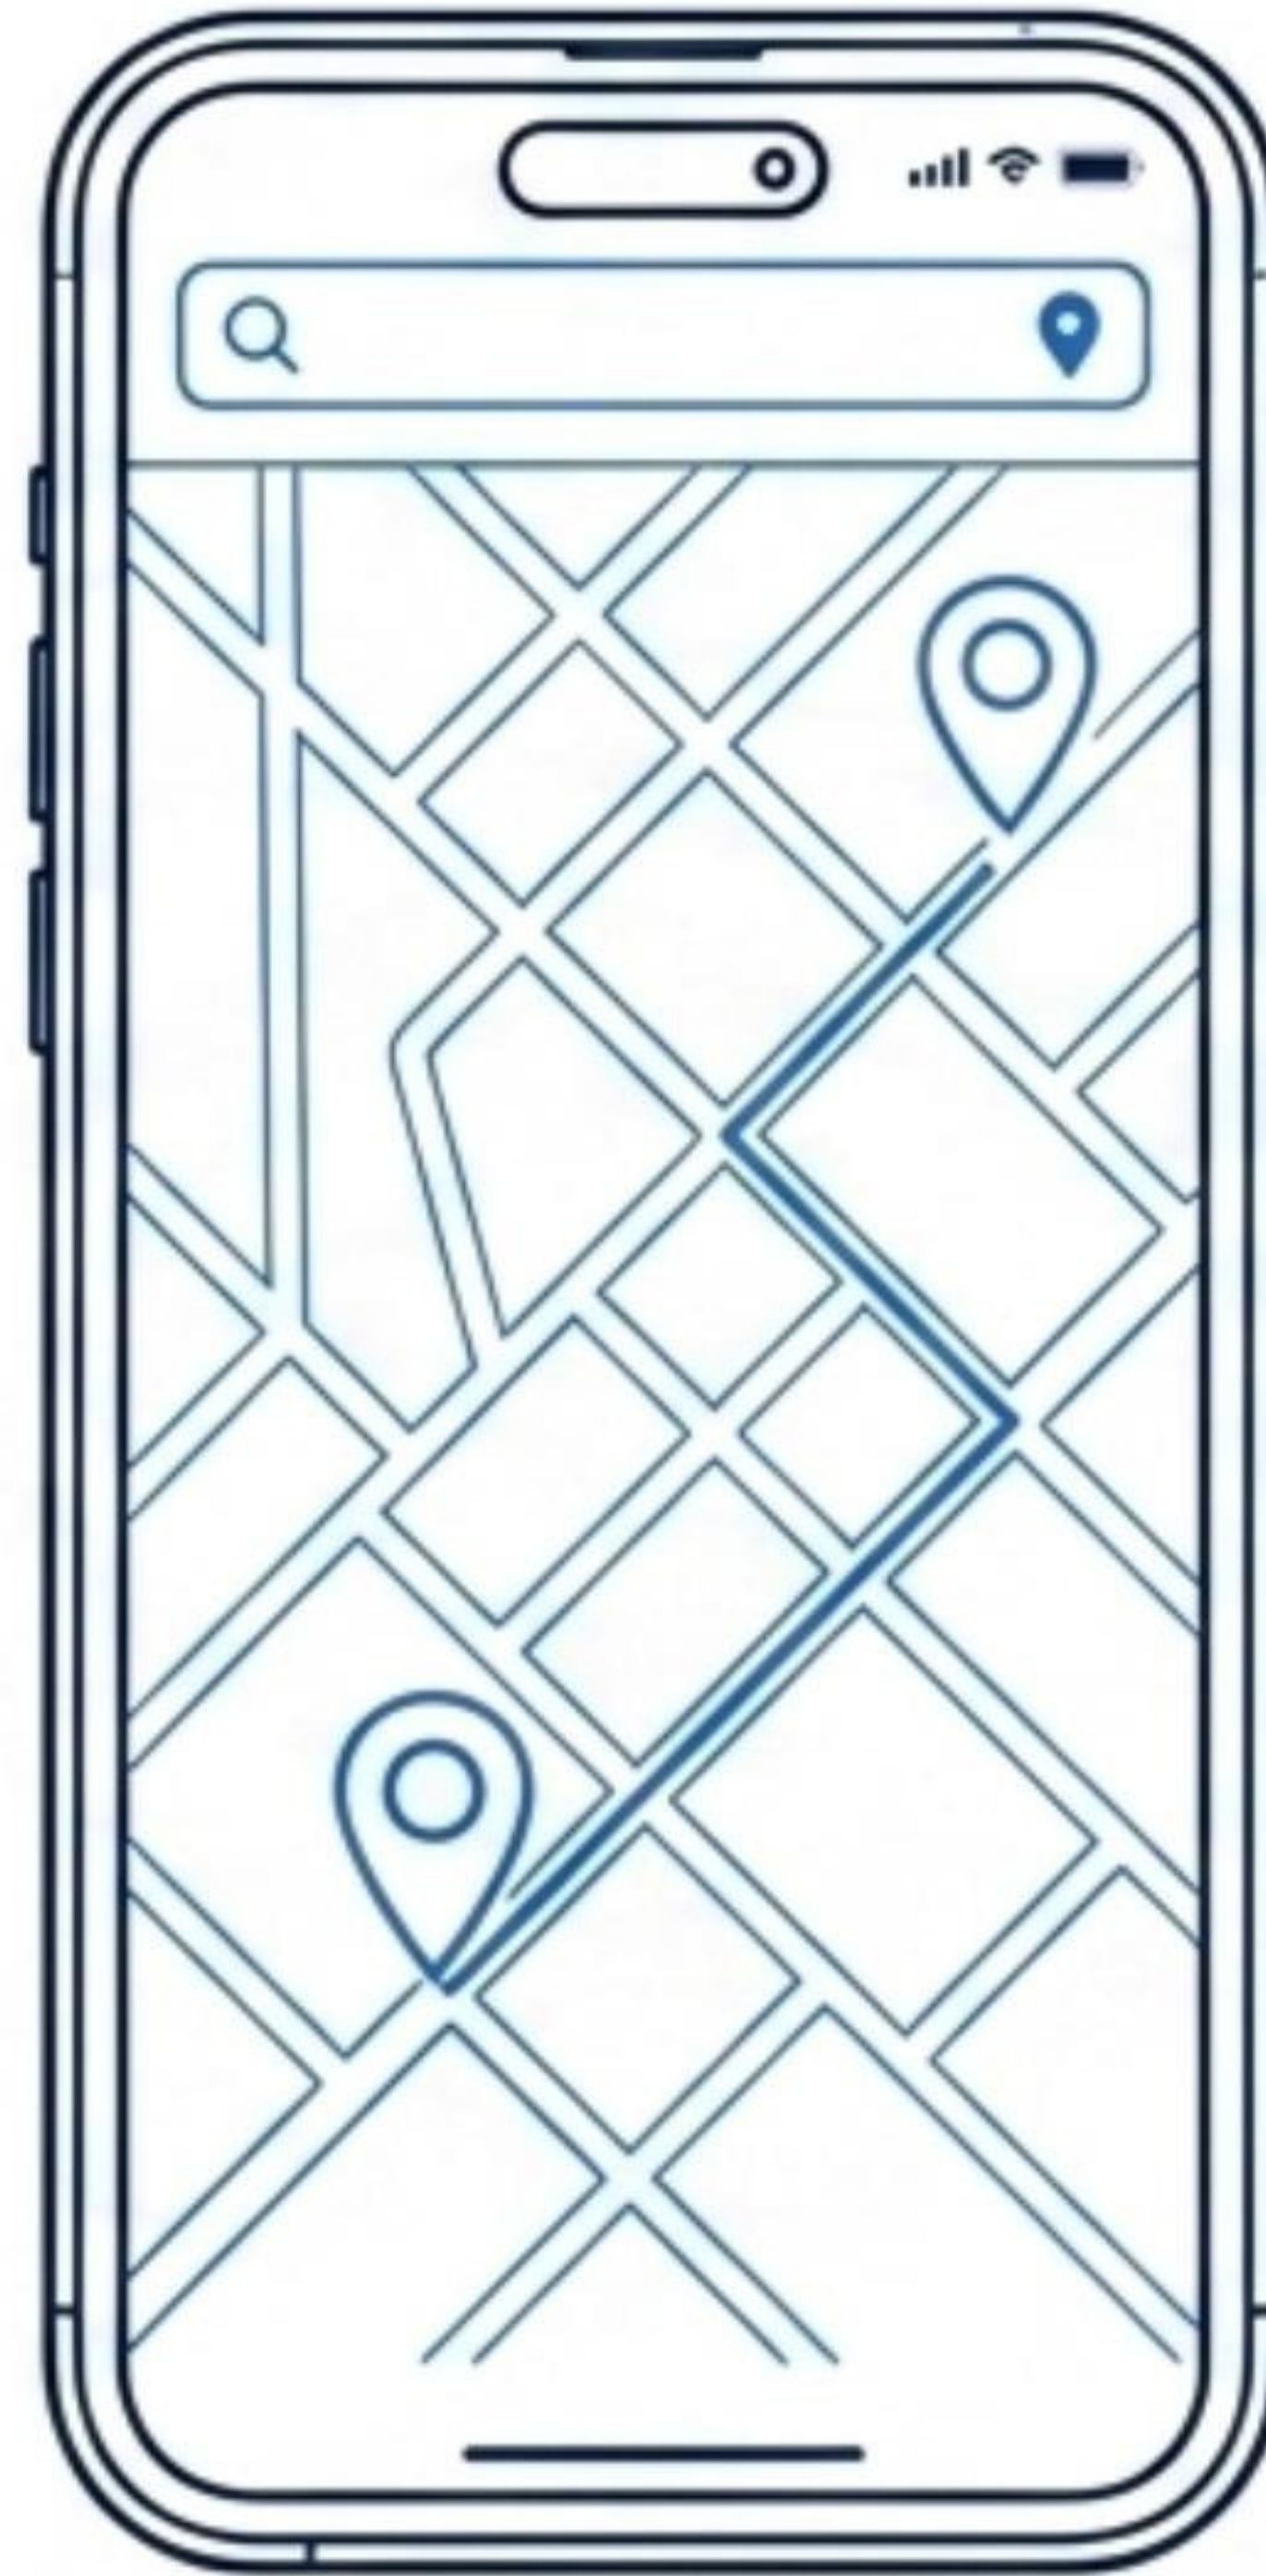

Ticket Management

A single channel for incoming requests with automatic registration and technician assignment.

Mobile Workspace

Tasks, instructions, and full facility history directly on the technician's tablet.

MRO Planning

Creation of schedules for routine maintenance and strict control over their execution.

Photo Reports & Control

Verification of completed work: before/after photos with geotags and anti-fraud protection.

Measurable Business Benefits

50%

**Increase in
Operational Speed**
(Reduced communication
time between staff)

25%

**Increase in
Loyalty**
(Higher trust from clients
and property owners)

20%

**Increase in
Discipline**
(Transparent control of
field crews)

15%

Cost Reduction
(Real-time cost tracking
and resource
optimization)

The ActiveMap license costs less than 1% of the annual payroll fund for line personnel, paying for itself in the very first months of operation.
