

ActiveMap: Digital Control of Road Maintenance & Repair

A tool for transparent management of special equipment, field crews, and road infrastructure.

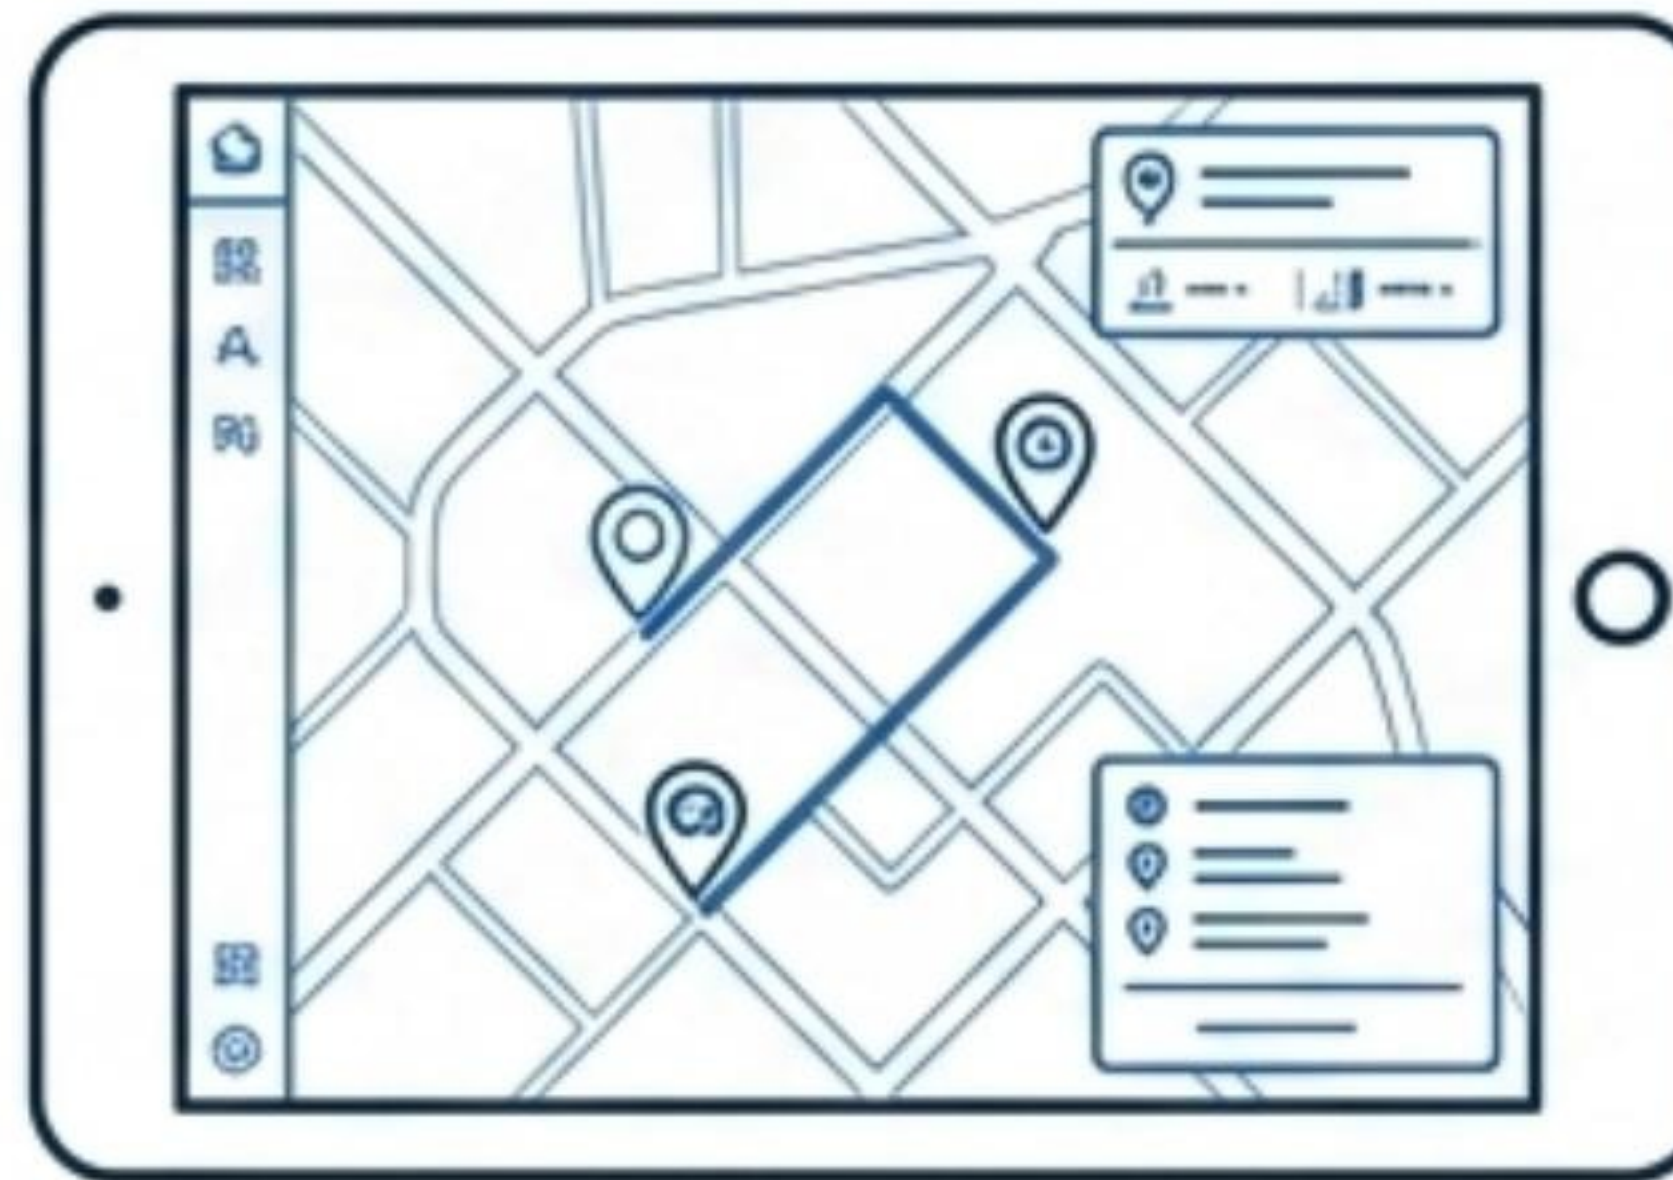

Process Transformation: From Paper to a Unified Ecosystem

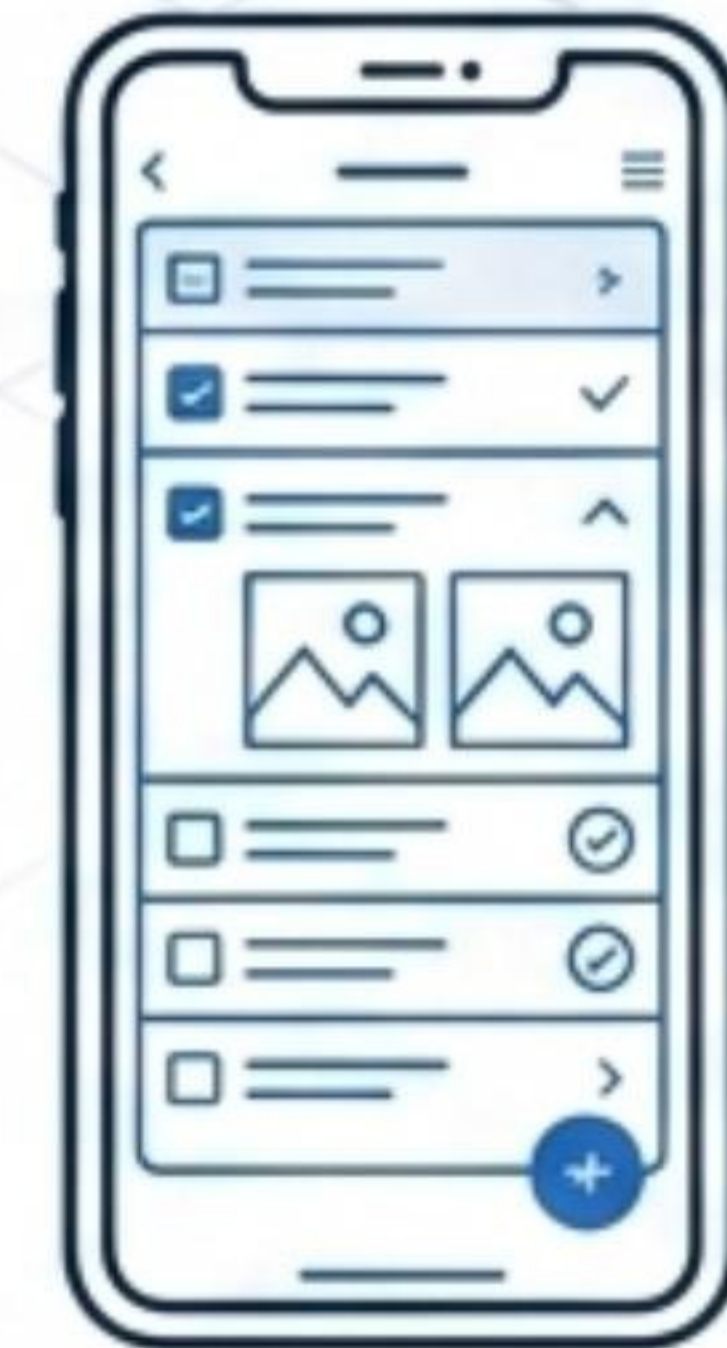

Unified Dispatch

Integration with city portals and automatic conversion of incoming requests into active tasks for field crews.

Transparent Control

Route planning and real-time GPS/GLONASS monitoring of all special equipment on a live digital map.

Digital Route Sheets

Replacement of paper waybills with mobile tasks. Performers view objectives and update completion status directly on site.

Key Platform Capabilities

100%

Geocontrol of Special Equipment

Records the exact fact and time of processing a specific road section. Provides strict protection against the misuse of snowplows and water trucks.

Offline Mode

Work Without Internet

Employees record task execution on remote highway sections. Data synchronizes automatically the moment network connection is restored.

Before / After

Digital Acts

Automatic geotags and timestamps embedded on task photos. Completely eliminates the risk of fictitious or unverified work reports.

Exact

Material Control

Records the actual consumption of sand, salt, and bitumen to rigorously optimize procurement and write-offs.

Precise Tracking

Measurable Business Results

OPTIMIZATION:

Efficient distribution of equipment load taking into account seasonality, traffic volume, and road categorization.

QUALITY (QA):

Remote control of the condition of any object. Transformation of road maintenance from a reactive planned-request model to a proactive one.

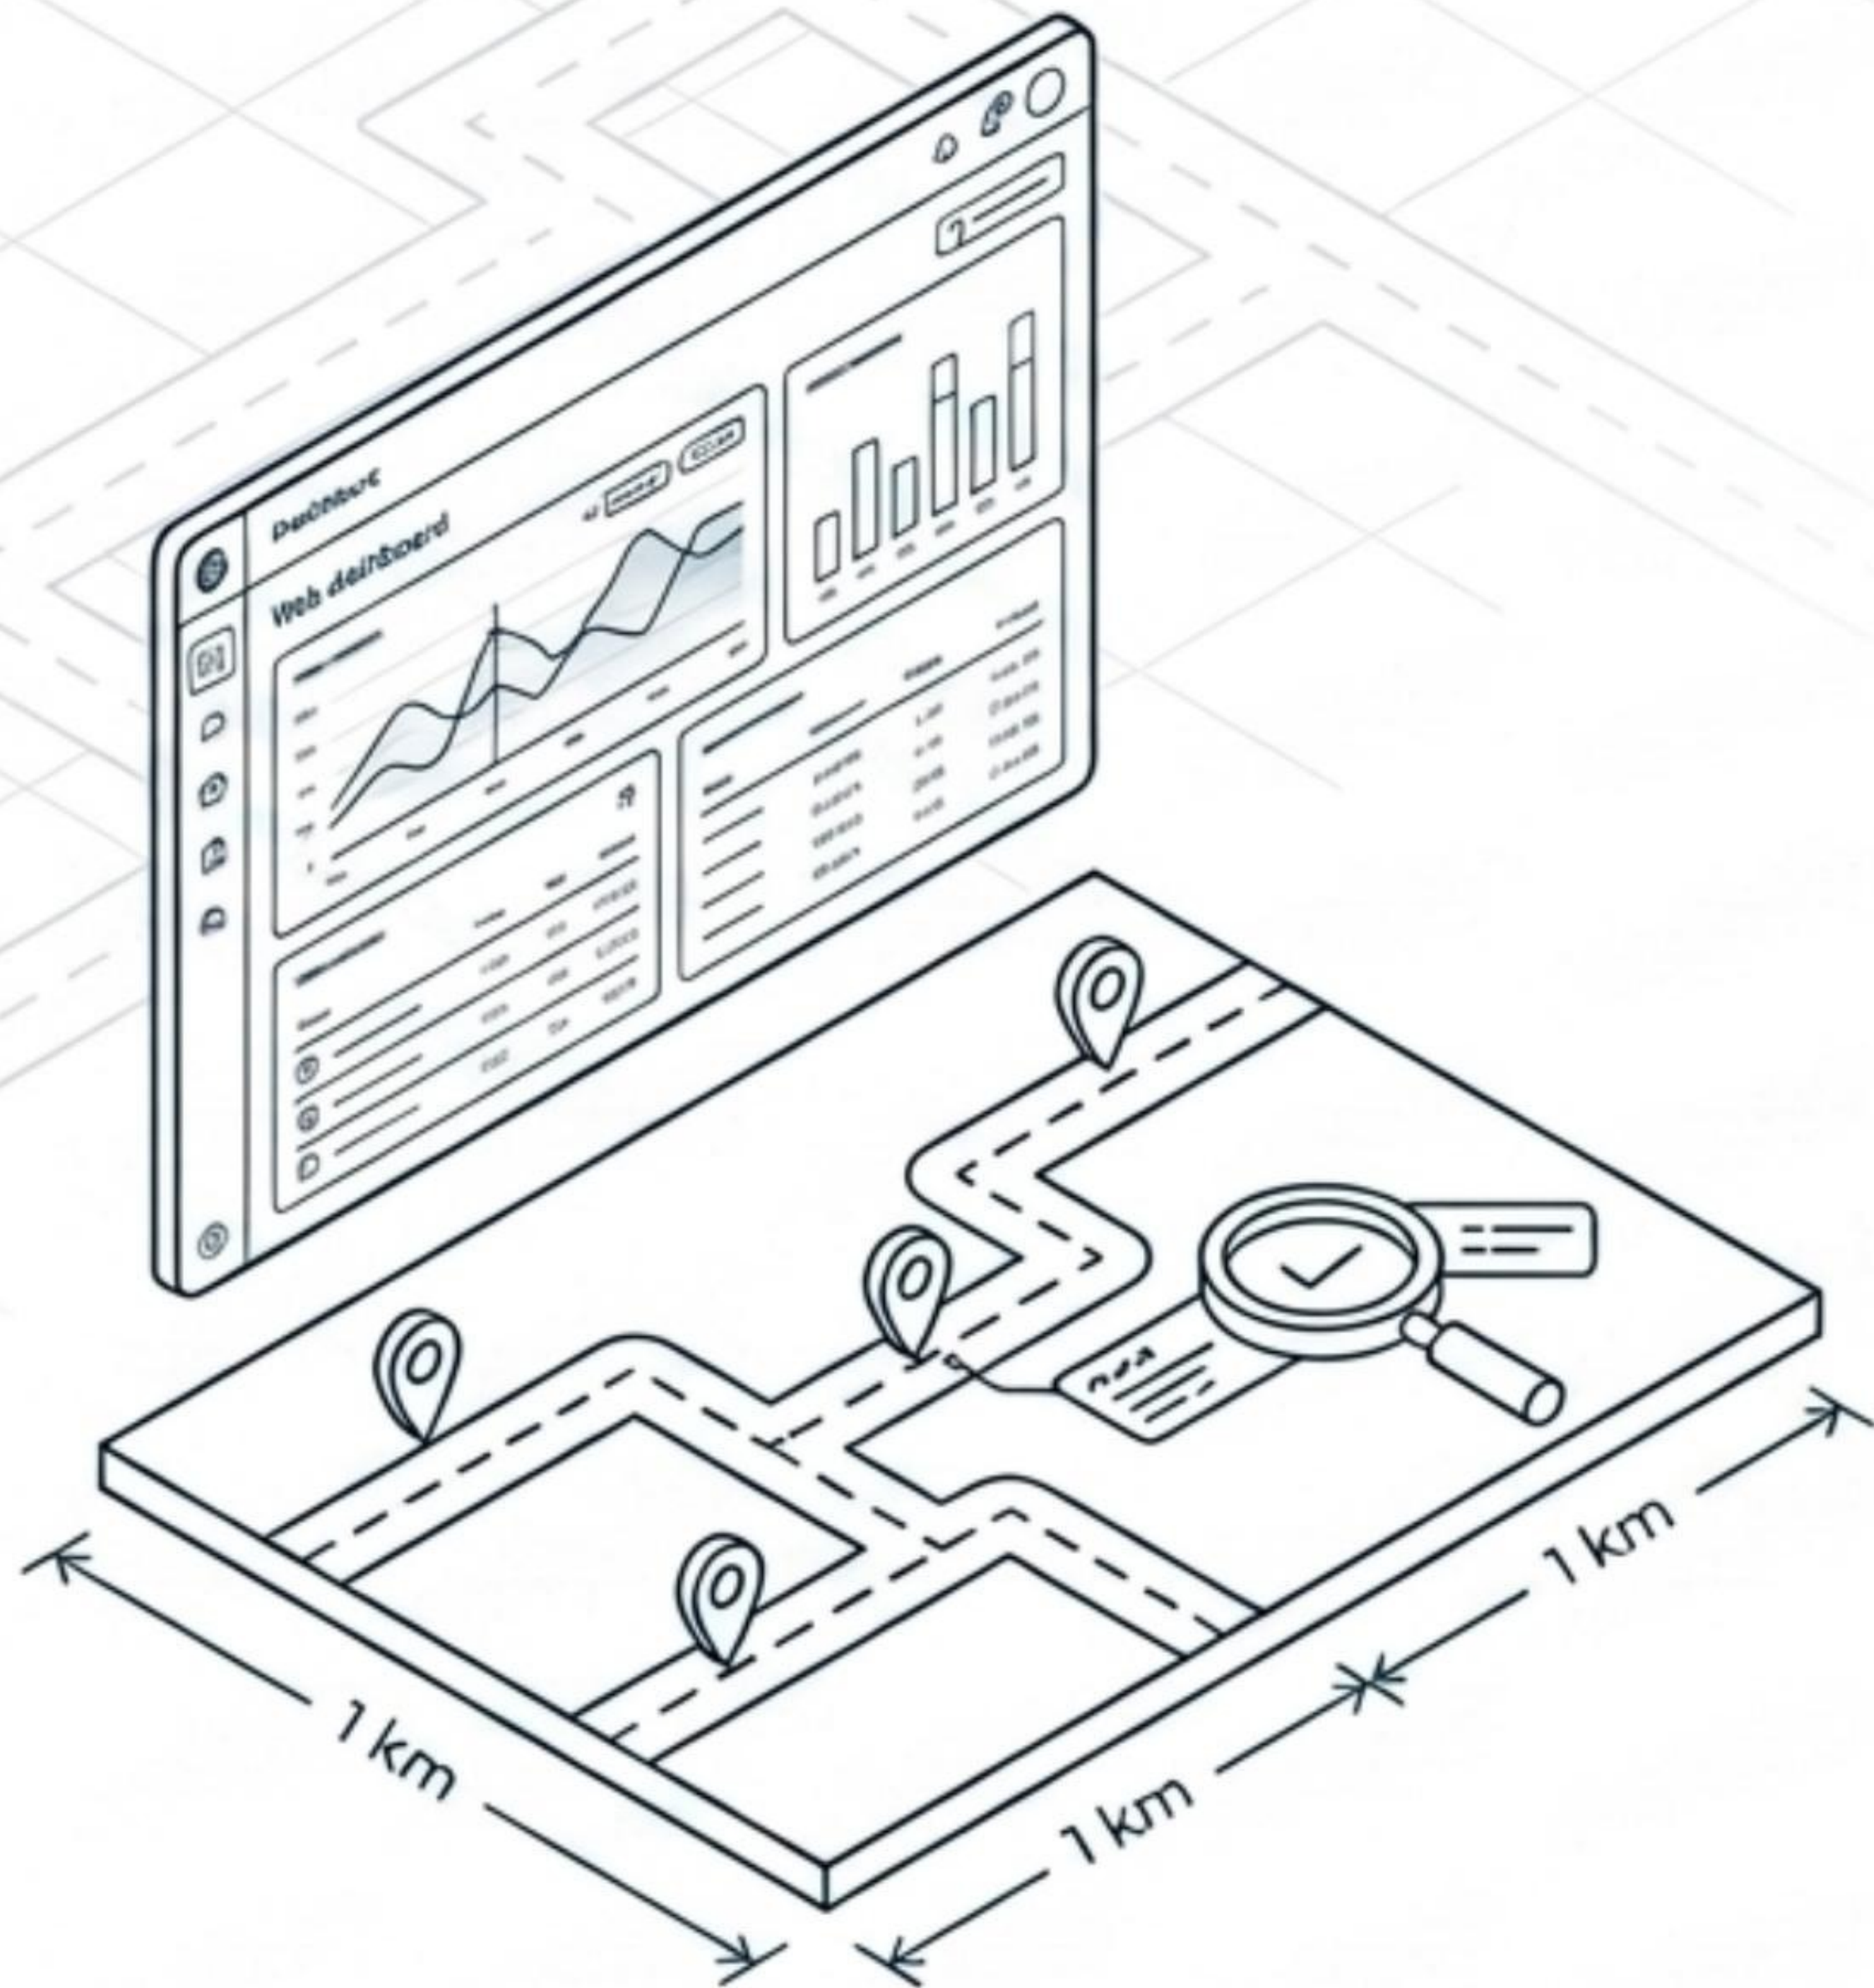

SPEED:

Drastic reduction in reaction times to incidents (potholes, broken signs) through direct data transmission to performers in seconds.

LONGEVITY:

Increased service life of the road surface achieved through strict, verifiable control of preventive maintenance works.

Absolute Transparency & Fast Onboarding

Protection of Completed Volumes

Automatic generation of individual reports, acts, and registers precisely linked to mileage.

Flawless confirmation of compliance with warranty obligations.
