

ActiveMap: Digital Control for Security System Services

A unified platform for managing M&R (Maintenance & Repair), scheduled inspections, and emergency calls.

Transparency

Evidence & Proof

Speed

The End of Fragmented Dispatching

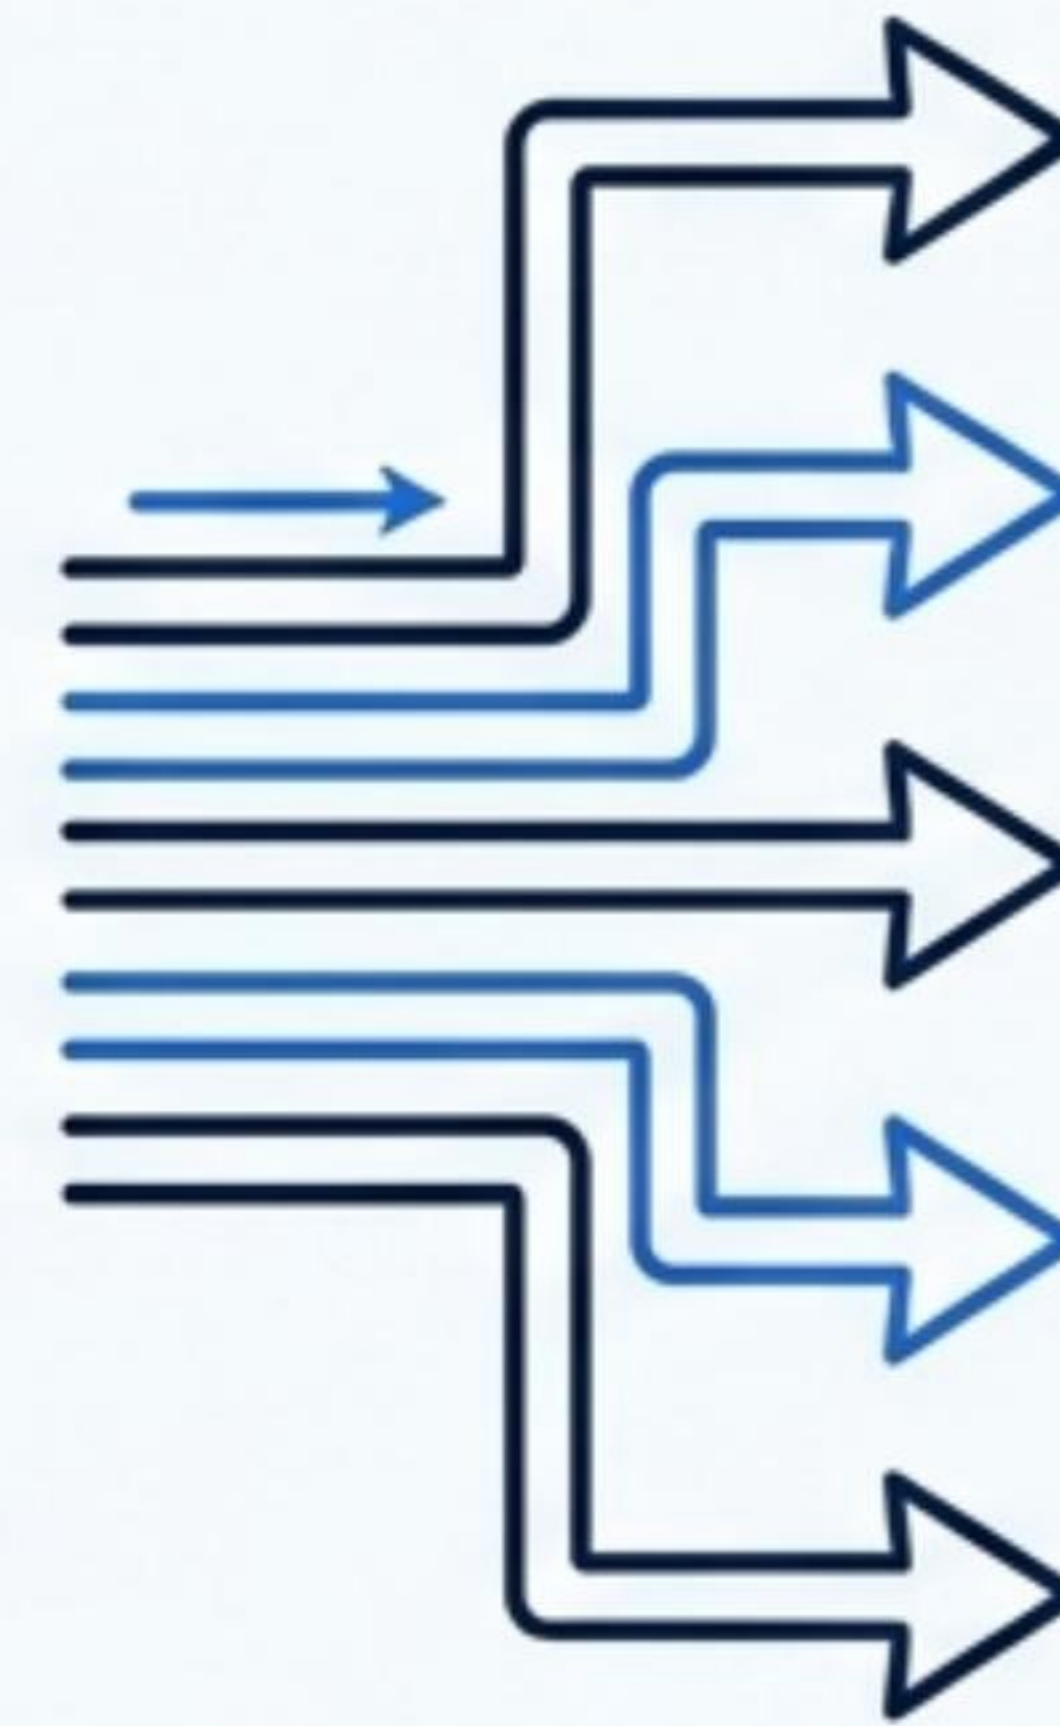

Transitioning from reactive chaos to a single source of truth.

Blind Trust & Fragmented Data

Chaos vs. Control

ActiveMap Hub

- ✓ Real-time visibility of all field engineers.
- ✓ Immutable photographic evidence.
- ✓ Automated SLA tracking.

The Full Lifecycle: From Scheduled Maintenance to Emergency Response

Automated Scheduling: Auto-generation of tasks based on monthly/quarterly schedules.

Digital Checklists: Standardized protocols for sensors, alarms, hydrants, and cameras.

Asset Profiling: 1-click access to the complete maintenance history of every facility node.

In-Field Reporting: Instant ticket creation via the mobile app upon defect discovery.

Smart Dispatch (GPS): Automatic routing and assignment of the closest available engineer.

SLA Control: Strict tracking of reaction and defect resolution times.

Specialized Tools: Protection Against Data Falsification

Unlike standard messenger apps, the ActiveMap guarantee ensures 100% data authenticity.

No Gallery Uploads

Photographic evidence must be captured in real-time. Old photos cannot be attached.

Strict Geofencing

Task closure is blocked automatically if the engineer's coordinates do not match the facility location.

Offline Mode

Uninterrupted operation in basements and remote sites without cellular connection.

Dispatcher Moderation

Mandatory quality evaluation of "Before/After" reports before a ticket is officially closed.

Proven Economic Efficiency & Industry Trust

Response Speed
(Operational Agility)

Operational Costs
(Fuel & Logistics)

Customer Loyalty
(SLA Adherence)

Take Chaos Under Control Today

Transition from "blind trust" to digital confidence.

Summary Card

- ✓ Automated M&R Scheduling
- ✓ 100% Control of Field Personnel
- ✓ Instant Reporting for Customers

Deployment Options: Cloud Solution (SaaS) or Enterprise Server (On-premise). Seamless 1C Integration available.
